RStudio—Installation and Set-Up

You can download and install RStudio Desktop for free using this link:
https://www.rstudio.com/products/rstudio/download/

You must have R on your system in order to install RStudio. If you need to install R, the URL above will direct you to a page that includes a link to install R. You can also use this link: https://www.r-project.org/

Set-Up

In an effort to save time, we have provided R code to install some packages that we will use during the workshop. To install the packages,
- open RStudio
- from the menu bar, click on *File* and choose *Open File*
- locate and open the file "ERC Faculty Workshop - Install Packages.R"
- once you have opened the file in RStudio, highlight all of the code and then click *Run* (the *Run* icon should be located toward the top of your RStudio window just to the right of center)
